IDENTIFIERS	*Texas Educational Assessment of Minimum Skills

ABSTRACT

This third volume of the Texas Educational Assessment of Minimum Skills (TEAMS) Student Performance Results reports school district and campus performance results alphabetically, based on the percentage of students passing all tests taken in 1989-90. Performance results of special education students are excluded. District and campus results are compiled excluding both special education and bilingual education students. Section I aggregates district results by certain demographic characteristics, which are explained in Appendix A. Section II reports performance results aggregated across grades for each campus and district in the state. These results are based on the grade 11 exit level results from the October 1989 TEAMS administration and the results for grades 3, 5, 7, and 9 from the TEAMS administration in February 1990. Grade 3 Spanish results are not included in either district or campus aggregations. In all, 196 pages of statistics in tabular form are provided. Each table illustrates: (1) the number of students tested in 1989-90; (2) the number of students passing all tests taken in 1989-90; (3) the percentage of students passing all tests taken in 1989-90; (4) the percentage of students passing all tests taken in 1988-89; (5) the change in percentage of students passing from 1988-89 to 1989-90; and (6) the percentage of students passing all tests taken in 1989-90 excluding special education and bilingual students. Introduction

Volume 3 of the *Texas Educational Assessment of Minimum Skills (TEAMS) Student Performance Results 1989-1990* reports school district and campus performance results, alphabetically, based on the percentage of students passing all tests taken. As explained below, this report contains TEAMS test results for all students tested, excluding the performance results of those students identified as special education students. District and campus results are also compiled excluding both special education and bilingual education students.

Section I aggregates district results, excluding special education student performance results, by certain demographic characteristics. A brief explanation of these demographic categories is provided in Appendix A. Section II reports performance results aggregated across grades for each campus and district in the state. These results are based on the Grade 11 exit level results from the October 1989 TEAMS administration and the Grades 9, 7, 5, and 3 results from the February 1990 TEAMS administrations. Grade 3–Spanish results are not included in either the district or campus aggregations. For each district and campus listed, the following column definitions explain the results presented in Sections I and II of this report.

"NUMBER OF STUDENTS TESTED 1989-1990" (Column 1) – This column provides the number of students taking the TEAMS test on that particular campus or district during the 1989-1990 school year excluding those tested students identified as special education students. This column is the base population for calculation of the percent mastery rate. The special education students are identified if they marked any of the following categories on their individual answer sheet: learning disability, emotionally disturbed, speech handicapped, visually handicapped, or other (non-visual) handicapping conditions. Students who are exempt from the TEAMS tests for special education reasons, as determined by an Admission, Review,and Dismissal Committee, or were absent, or whose test was invalidated are not included in this base population.

"NUMBER PASSING ALL TESTS TAKEN 1989-1990" (Column 2) – This column presents those students in the base population, as defined above, who have passed all sections of the TEAMS test taken. Students who were absent or exempt from one subject area, but tested in another subject are included in this column only for that subject area tested. For example, if a Grade 5 student took only the mathematics subject area test and was absent for the reading and writing subject tests, and masters the mathematics test, that student is included in the base population (Column 1) and in the count of those who passed all tests taken (Column 2). Once again, special education students, as defined above, are not included in this count.

"PERCENT PASSING ALL TESTS TAKEN 1989-1990" (Column 3) – This column is the percentage of students passing all tests taken, excluding the special education students, derived by dividing the number students passing all tests taken (Column 1) by the number of students taking the test (Column 2).

"PERCENT PASSING ALL TESTS TAKEN 1988-1989" (Column 4) – The same value as derived in Column 3 using TEAMS performance results from the 1988-1989 school year. The same exclusion criteria were applied to the 1988-1989 data.

"CHANGE IN PERCENT PASSING 1988-1989 TO 1989-1990" (Column 5) – This column presents the gain or loss in the percentage of students passing all tests, excluding special education students, between the 1988-1989 and the 1989-1990 school years. The difference is derived by subtracting Column 4 from Column 3.

"PERCENT PASSING ALL TESTS TAKEN 1989-90 EXCLUDING SPECIAL EDUCATION AND BILINGUAL STUDENTS" (Column 6) – This column uses the same method for determining the base population (equivalent to Column 1) and the number passing all tests taken (equivalent to Column 2) by excluding both special education students and students participating in a bilingual/ESL program. The calculation for the percent of students passing all tests taken excluding both groups of students is the same as for Column 3.

Volume 1 of the *Texas Educational Assessment of Minimum Skills (TEAMS) Student Performance Results 1989-1990* reports statewide performance and trends, performance data aggregated by demographic characteristics, and regional results.

Volume 2 of the *Texas Educational Assessment of Minimum Skills (TEAMS) Student Performance Results 1989-1990* contains school district performance results aggregated by percent of students passing all tests taken and average scaled scores for students tested at each grade level.

Appendix A

Categories on the Statewide Demographic Report

The statewide demographic report was produced with the following categories.

Average Daily Attendance (ADA) Groupings

Districts are grouped into these nine size categories by their refined average daily attendance (ADA), which is collected for four weeks each semester on the *Superintendent's Report of Pupil Attendance and Contact Hours, Table I.* Refined ADA is calculated by totalling attendance for the best, or highest, four weeks and dividing by four.

District Type

Districts in Texas are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to urban areas are used to determine the appropriate group.

Wealth

The wealth of a district is determined by total taxable property value per refined ADA. The property value used is taxable value (for the last complete calendar year, i.e. 1989) as determined by the State Property Tax Board (SPTB). Refined ADA is the current school year ADA, i.e. 1989-1990. This analysis of wealth is broken down into two sections. The first wealth grouping classifies districts into ten wealth categories with approximately equal numbers of districts in each. The second grouping displays districts with wealth under and over the state average. The six special statutory districts form a separate group because they have no taxable property wealth.

Wealth by Equal RADA Per Group

Wealth is defined as total taxable property value per refined ADA and is used as an indicator of a district's ability to raise local funds. The property value used is 1989 taxable value as determined by the State Property Tax Board (SPTB). This wealth grouping classifies districts into 20 categories with approximately equal numbers of students in each. The six special statutory districts form a separate group because they have no taxable property wealth.

Total Effective Tax Rate

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. The category shows the

total effective tax rate, which is determined by dividing the 1989 total levy amount by the 1989 SPTB total taxable property value. The six special statutory districts are in a separate category because they do not levy property taxes.

Maintenance and Operation Effective Tax Effort

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. The category shows the maintenance and operation (M&O) effective tax rate, which is determined by dividing the M&O levy amount by the SPTB total taxable property value. The second M&O tax effort category splits districts above and below the state average M&O effective tax rate. The six special statutory districts do not levy property taxes.

APR Groups

This category splits the districts into sixteen categories by size of enrollment, whether they are above or below the state average for district wealth, and whether they fall above or below a level of 40% low income. The six special districts form a seventeenth category.

State Property Tax Board (SPTB) Highest Category

This section divides districts into the primary State Property Tax Board land use categories: residential, land, oil and gas, or business. The one category of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory districts form a separate group because they have no taxable property wealth.

Small/Sparse Adjustment

This category has four categories with approximately equal numbers of districts in each. The districts are grouped by the amount of their Small/Sparse Adjustment as a percentage of their Adjusted Basic Allotment. A fifth category contains all districts receiving no Small/Sparse Adjustment.

Price Differential Index (PDI) level

The price differential index reflects geographic variations in costs beyond the control of school districts. The index currently in use has a minimum value of 1.01 and a maximum value of 1.20. This category divides districts into five groups with approximately equal numbers of districts in each.

Operating Cost/ADA

Operating costs, taken from the *Public Education Information Management System* (PEIMS) submitted in Fall 1989 by school districts, are defined as the sum of all expenditures budgeted for the operation of the district, for all funds. The operating expenditures are a subset of the total expenditures; they

do not include debt service, capital outlay, or ancillary services expenditures. The per student amounts are the current year expenditures divided by the current year refined ADA. Districts are grouped into five categories with approximately equal numbers of districts in each.

Region
The state is divided into 20 regions, each served by an Education Service Center.

TEAMS: Percent Passing All Tests Taken

For all grades and subject areas, the total number of students who passed all sections taken is expressed as a percentage of the total number of students tested. Districts are grouped into four subcategories with the percent passing ranging from under 60 percent to 90 percent and over.

Student Density

The square miles in a school district were determined through a joint effort by the State Property Tax Board (SPTB), the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the SPTB were digitized by the Water Commission and acreage was determined. Density is the number of students in refined ADA per square mile. Density groups range from less than five students per square mile to 100 or more students per square mile. The six special statutory districts form a separate group since mileage data is not available for them.

Refined Average Daily Attendance (RADA)

This category looks at the growth or decline in student population over a one year period. Districts whose refined ADA decline represent one grouping, while the remaining groups show one year growth rates ranging from "0%-3%" to "10% and over."

Black, Hispanic, and Minority Percent

In these categories, districts are grouped according to the ethnic composition of their student population. The *Fall Survey of Pupils in Membership*, a one-day head count taken in the fall of each school year, provides this information. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include American Indian or Alaskan Native; Asian or Pacific Islander; Black, not of Hispanic origin; and Hispanic. Each of these categories has six subcategories with the particular population ranging from less than five percent to fifty percent and over.

Percent Low Income

Percent low income is the best six months average of the previous school year's count of students eligible to participate in the free and reduced price

lunch program expressed as a percentage of the current year's refined ADA in the district. There are six groupings in this category ranging from under 20% to 80% and over.

Average Teacher Experience

In this category, districts are grouped into four categories with approximately equal numbers of districts in each. Average years of teacher experience is calculated as the ratio of total years of professional experience for all teachers in the district divided by the total teacher full-time equivalent (FTE) count.

Average Teacher Salary

Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount does not include career ladder or any other supplements.

Percent Minority Teachers

In this category, districts are grouped according to the minority composition of their teaching populations. Minority percent is calculated as the sum of all non-white teachers expressed as a percent of total teachers. The category has five groupings with the minority population ranging from less than five percent to fifty percent and over.

Percent of Teachers with Advanced Degrees

The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a masters or doctorate degree divided by the total teacher FTE count.

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a non-segregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, 1973 EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; AND VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED IN 1974.

It is the policy of the Texas Education Agency to comply fully with the nondiscrimination provisions of all federal and state laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency makes positive efforts to employ and advance in employment all protected groups.
